

## Autistic traits are more common in trans-identified girls than trans-identified boys.

A cohort study of Australian children with trans identities [1] found that 74.5% of the autistic group were female, compared to 64% of the non-autistic group. Females formed a significant majority of both groups.

	Non-autistic traits	Autistic traits	Total
	<b>N = 283</b>	<b>N = 239</b>	<b>N = 522</b>
SRS-2 Total T-score (mean, SD)	50.1 (5.2)	71.6 (9.0)	59.9 (12.9)
Birth assigned gender (n, %)			
Male	102 (36.0)	61 (25.5)	163 (31.2)
Female	181 (64.0)	178 (74.5)	359 (68.8)
Age (mean, SD)	13.1 (3.6)	14.0 (2.9)	13.5 (3.3)
